Indian Industrial Growth Slows Down

India's industrial growth slowed to 6.7% in July 2026, down from 8.8% in June, with notable contributions from the manufacturing and electricity sectors. The manufacturing sector grew by 7.3%, though below June's 9.5%. Economists highlight a divergence in consumption patterns, noting weak rural spending on daily items while consumer durables surged by 10.5%. Capital goods saw 16.1% growth, maintaining double-digit performance, while infrastructure grew by 6.9%. The mining sector, however, faced a contraction of 0.9%.
